SUPPORT OUR CHAPPY!

WE NEED YOUR HELP!

You can provide valuable support for Chaplain Alexia Hoffman at Buderim Mountain State School in 2026

Between 2012 – 2025, we raised over \$250,000 from our local business and school community. This funding has facilitated two extra days per week for our Chappy at BMSS, enabling the chaplaincy program to be a vibrant and integral part of our school and community. This funding is additional to National Student Wellbeing Program (NSWP) funding.

As we welcome a new year, we need your help to continue the work of Chappy at our school throughout the year 2026 and beyond.

SCOPE OF WORK

The scope of the Chaplaincy program at BMSS has grown considerably over the recent years. Students and families present with different, often complex needs, from simply requiring a friendly, non-judgmental person to talk to, to calling for assistance with more involved, sensitive needs and difficulties.

CHAPPY'S OBJECTIVES

In 2026, we want to ensure that Chappy Alexia can continue working with our children providing this much-needed service within our school, assisting Chappy to meet the following objectives:

The ability to spend more time in the school to build on relationships with students, families and staff.

Allowing the implementation of programs that will help in both intervention and prevention, rather than just providing relief and reactive responses.

Nurturing greater exposure and contact within the wider community, including businesses, agencies and families.

Our chaplaincy service has become well known in the wider Buderim Community and works alongside other not-for-profit groups, churches and local businesses to assist families in a holistic, individual approach.

Chappy Alexia aims to be the friendly face who shows compassion and offers practical assistance to children and families, whatever their circumstances and walks of life.

Chappy Alexia

CHAPPY'S WORK IN 2026

Chappy Alexia fulfills a wide variety of roles and acts as an invaluable support worker for students, staff, parents, family members and all those who walk through our school gates. This year, her work will involve a myriad of tasks, including:

- One-on-one meetings with students who identify as struggling socially and emotionally at school, as well as at home
- Support and hands-on assistance with camps, excursions and sporting activities
- Lunchtime activities including the Chappy room (targeted games, colouring-in, mindfulness sessions)
- Targeting activities to support teachers through action-based activities, designed to create opportunity for personal growth and reflection
- Assisting the schools Guidance Officer through circle time, parent sessions and community engagement including Parent Chat Club twice per term
- Supporting Little Explorers Playgroup, held twice a week for kindy aged children
- Community Kitchen endeavours, supporting families in crisis situations
- Supporting families in difficult times with Christmas Hampers
- Administration and entertainment at Breakfast Club, helping create a sense of belonging through games and activities. Students join The Chappy Crew to work alongside others learning to serve the Breakfast and run the games, creating a positive space and helping students grow leadership skills
- Staff wellbeing with weekly check-ins and personal interactions
- Engaging and growing volunteering
- Grief and loss help through the 'Season for Growth' program
- Supporting student leadership with local and global community initiatives

*We are building our lives one day at a time,
One hour at a time, one interaction at a time
We build relationships one conversation at a time
What we do in these moments matters.*

CHAPPY'S WORK IN 2026

Chappy Alexia runs a number of important programs at BMSS and endeavours to continue doing so in 2026. These programs include:

- The “Feelings” program for Prep students, designed to help young students learn to identify and manage their feelings and emotions
- The “Lopyy the LAC” series for Year One students, supporting positive self-talk and addressing anxious moments. This program is designed to complement the BMSS program ‘PERKS’
- Friendship programs to support students struggling to fit in
- The “Shine” program for Year Six girls, designed to help encourage identity, strength and purpose
- The “Potential Project” for Year Five and Year Six students with the aim to help students understand that their potential is unlimited. A space where they develop respect for themselves and others, discovering the importance of appropriate behaviours and attitudes through action-based learning. This program is all about empowering and encouraging students to make healthy decisions and to accept responsibility for their own lives.
- Developing and nurturing the Mentoring Program

Whilst I have had many years experience as a Chaplain, I truly cherish my role at the special school that is Buderim Mountain State School. As I continue to find my unique fit and purpose in this amazing school, the above list will change and evolved as I grow my role as school Chaplain ~ Chappy Alexia
